

Full declaration of ingredients

420 UV-Protection-Oil Extra, clear

Binding agents:

- based on the re-growing vegetable raw materials sunflower oil, soybean oil, thistle oil and linseed oil.

Solvents:

- aliphatic hydrocarbons = disaromatized white spirit (benzene free)

Additives:

- zinc-zirconium-cobalt-octoates (are obtained from the respective minerals and are lead-free)
- ketoximes
- polysiloxanes (on the basis of silicic acid)
- UV-absorber

The listed ingredients serve to a regular drying and the prevention of film formation (5 years storage stability) as well as a strong water repellency. The UV-absorber increases the weathering and aging resistance.

Active agents (film protection):

- Dichlofluanid

Osmo UV-Protection-Oil Extra contains active agents to protect the coating against algae and fungus attack.

Further details concerning technical characteristics etc. can be obtained from the respective product information.
